PROFILE SUMMARY

Motivated and detail-oriented Mobile Developer with hands-on experience in Flutter and Kotlin. Skilled in building scalable and user-friendly mobile applications, integrating Firebase services including Authentication, Firestore, and Cloud Messaging. Proven ability to work in agile teams using RESTful APIs and state management solutions like Provider. Strong foundation in version control with Git and a passion for delivering seamless mobile user experiences.

WORK EXPERIENCE

Argema Teknoloji

Mobile Developer

- Developed a remote control mobile application for the "Resistor Cutting Machine" device, enhancing operational convenience.
- Integrated Firebase services and implemented REST API connections to ensure real-time communication.

Oyun ve Uygulama Akademisi

Intern

- Participated in a competition by developing the "CodeMania" application, gaining experience in app design and user interaction.

University Projects

- Led the development of "Petfix," a mobile application for pet care management, as a team leader.
- Oversaw the design, development, and testing processes while coordinating a small development team.
- Also contributed to several other mobile applications, showcasing strong skills in Flutter and Kotlin.
